„QinCity“ Survey

“Ageing in the environment: regeneration, gentrification and social exclusion as new issues in environmental gerontology (2010 – 2012)”

(Czech Scientific Foundation Grant No. P404/10/1555)

- quota selection, F2F, P&P, autumn 2011
- N = 1921
- 14 cities (regional centres + the capital)
- 41 %  59 % 
- 13 % university degree (12 % primary education)
- 13 % age 80+ (35 % with IADL restrictions)

Research questions:

- What is the effect of changing external environment on the aging experience?
- How does the (biological) ageing influence the use of the space/place ?
 - perception of regeneration and gentrification
 - social networks of ageing people and their everyday life
 - strategies of dealing with the negatives and use of the positives
 - the issue of (symbolic) displacement

Older voices on spatial changes /1

- Commercialisation and decrease in residential/green spaces.
- Diminishing availability of affordable housing.
- Privatisation of housing stock - possibility or need to become an owner.
- Risks of dislocation as a result of restitutions / privatisation.

Older voices on spatial changes /2

- Intensification of traffic and related issues (noise, dirt, pollution...).
- Changes in availability of public transport (a denser net positively evaluated in Brno vs. criticisms of Ostrava).
- Age-unfriendly services, especially those related to leisure (cafés, restaurants,... too expensive and/or customised to younger consumers etc.).

Older voices on spatial changes /3

- Deterioration of (intergenerational) relationships in the neighbourhood; partially due to rapid changes in house/flat occupancy.
- Internationalisation of the social space (e.g. gentrification led by foreigners; Vietnamese shopkeepers, ...).
- Social pathology (becomes visible and) influences quality of live (increased number of gambling clubs, syringes in parks, drunk youth or homeless people in the streets,...).

inclusion – participation – safety

OUTDOOR SPACES AND BUILDINGS

WHO Essential Feature	QinCity indicator
Dimension: Outdoor spaces and buildings	
Public areas are clean and pleasant.	(Sub-index of aesthetic (non)quality (a reversed scale)) Our street is often full of garbage. In my neighbourhood there are a lot of unknown and homeless people. There are a lot of old and derelict houses with no tenants. It is dangerous to walk outside even during the day. <i>(fully disagree + disagree).</i>
Green spaces and outdoor seating are sufficient in number, well maintained and safe.	(Sub-index of green environment) There are pleasant benches in sufficient numbers around here. There is enough greenery around here. There are nice places I can see from my window. <i>(fully agree + agree)</i>
Pavements are well-maintained, free of obstructions and reserved for pedestrians.	The majority of the streets in our surroundings have well maintained pavements. <i>(fully agree + agree)</i>
Pedestrian crossings are sufficient in number and safe for people with different levels and types of disability, with non-slip markings, visual and audio cues and adequate crossing times.	In our streets there are enough pedestrian crossings, so I can safely cross the road. <i>(fully agree + agree)</i>
Outdoor safety is promoted by good street lighting, police patrols and community education.	The streets are well lit during the night. <i>(fully agree + agree)</i>
	We can often see the police patrolling around here. <i>(fully agree + agree)</i>
Services are situated together and are accessible.	Most shops and services that I require are here in my neighbourhood. <i>(fully agree + agree)</i>
Public toilets outdoors and indoors are sufficient in number, clean, well-maintained and accessible.	There are enough public toilets in the city centre. <i>(fully agree + agree)</i>

Dimension: Transportation

Public transport costs are consistent, clearly displayed and affordable.

(Sub-index transportation)
Taking in to account my current needs, public transport is well organised.

Vehicles are clean, well-maintained, accessible, not overcrowded and have priority seating that is respected.

The time tables are usually clearly readable.
The vehicles of public transportation are usually easily accessible.

Transport stops and stations are conveniently located, accessible, safe, clean, well-lit and well-marked, with adequate seating and shelter.

The transport stop is close to my home.
(fully agree + agree)

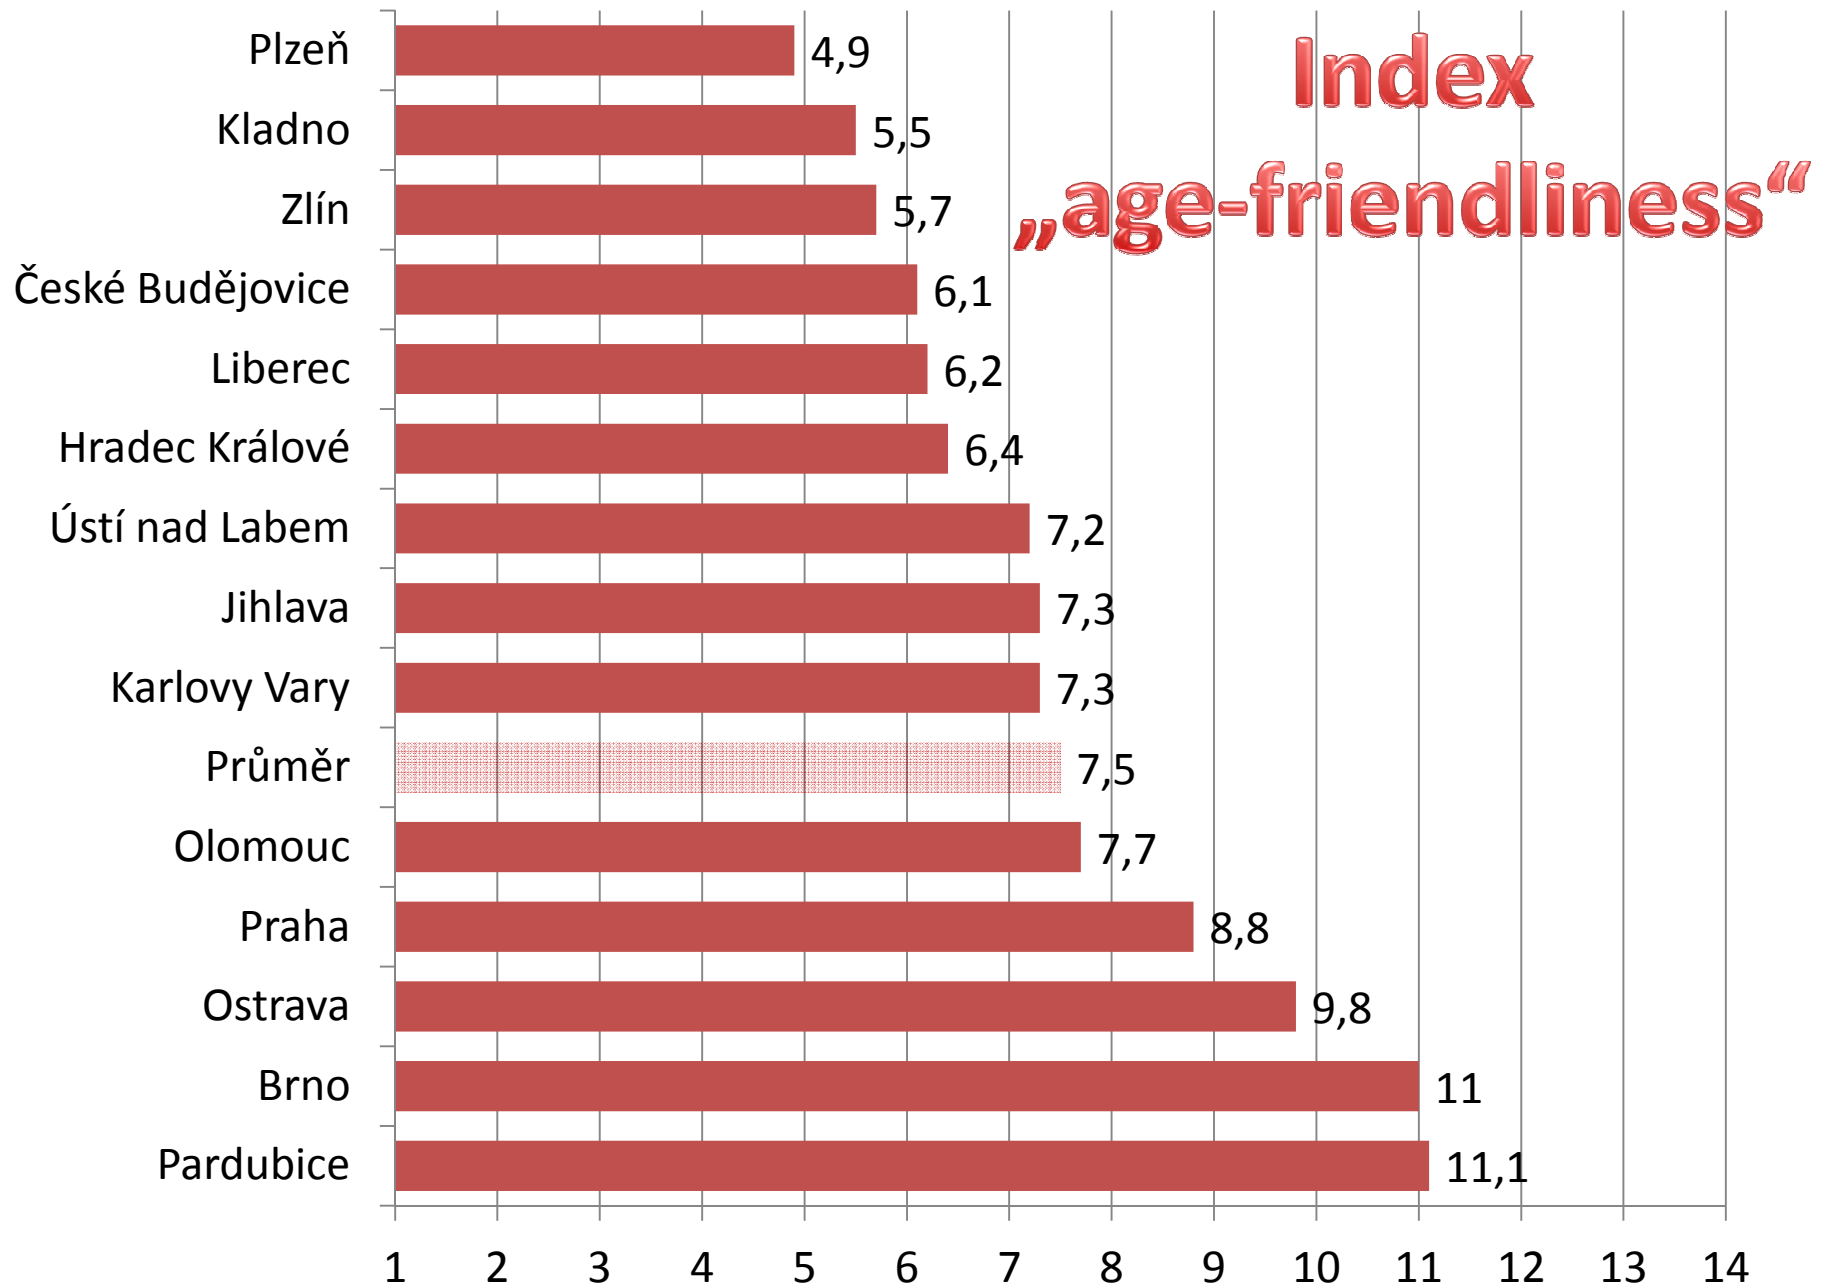

Parking and drop-off areas are safe, sufficient in number and conveniently located.

Is there a convenient possibility to park a car in the vicinity of your home?
(yes, always + most of the time)

☺ Plzeň (Pilsen)

- issues only with parking availability

Municipal services:

- senior taxi
- legal advice office for older citizens
- intergenerational centre

☹️ **Pardubice, Brno**

- **even if parking indicator disregarded, „losers of the exercise“**
- **Brno 9x; Pardubice 7x/10 indicators on 10.-14. position**
- **Pardubice: night lighting, unsafe pedestrian areas, not enough green spaces**
- **Brno: greenery & „aesthetics“, toilets, services**

Active Ageing Index

The Active Ageing Index (AAI) is a tool to measure the untapped potential of older people for active and healthy ageing across countries. It measures the level to which older people live independent lives, participate in paid employment and social activities as well as their capacity to actively age.

Domains

Employment

Participation in society

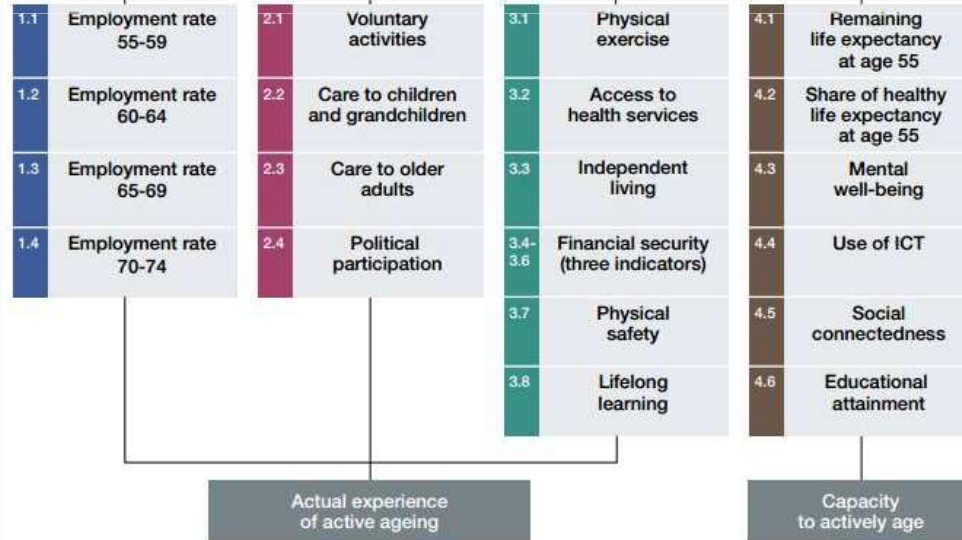

Independent, healthy and secure living

Capacity and enabling environment for active ageing

Indicators

< Higher index value Lower index value >

* Financial security aspects are captured by three indicators: (1) Relative median income of 65+ relative to those aged below 65 (2) No poverty risk for older persons (50% of median poverty line) and (3) No severe material deprivation rate.

Overall results of the RAAI for the CR (NUTS2 AAI)	<i>Dimensions/Rank</i>				<i>Results</i>

If you had a “magic ring” and by just putting it on your finger you could change one thing in your neighbourhood, what would it be?”

Wish for change...

- greenery
 - (25 % Prague; 17% Ostrava; 15 % Brno)
- cars (pollution + noise), parking, transportation
 - (16 % Brno; 10% Ostrava; 9% Prague)
- „marginalised“ (Roma, homeless people, vandalism, safety ...)
 - (17% Ostrava; 10 % Brno; 6% Prague)
- ...aesthetics and tidiness; air pollution; social (neighbourhood) relations; sidewalks; services; ...

Wish for change...

- greenery & aesthetics
 - (25 % Prague; 17% Ostrava; 15 % Brno)
- *“Shut down the Brno–Prague highway and replace it with greenery; I wish for a little more good health and more green spaces; I would plant flowers everywhere and built fountains and ponds...”*.

Wish for change...

- cars, pollution, parking, transportation
 - (16 % Brno; 10% Ostrava; 9% Prague)
- *“to limit, exclude, take away, not let in, get rid of, remove and cancel the traffic, keep it away from houses (including public transport, noisy trams, and railways), build the bypasses, introduce roundabouts, solve the lack of parking spaces and, by that, resolve the issue of non-accessible sidewalks...
to have transport from anywhere*

Wish for change...

- *„Move out troublemakers and Gypsies; Roma citizens; inadaptable“. “The Roma, their crimes; their favoritism, flats for free” are seen as a problem, as a result “we cannot live with them; Roma communities should disappear, be moved further away; outside the center; it is difficult to live with them.” “To banish, expel gypsies, blow bums off the streets, evacuate the Gypsies and the Arabs; eradicate graffiti; vacate Russians, drug addicts and the homeless...*
- *„marginalised“ (Roma, homeless people, vandalism, safety ...)*
 - (17% Ostrava; 10 % Brno; 6% Prague)
